

Bembo Book™

A faithful reproduction of the original hot metal family

This new digital version of *Bembo*, called *Bembo Book*, has been designed to be more suited to text setting in the size range from 10 point to 18 point. Based on the hot metal 10/18 point drawings, this new face has been carefully drawn to produce similar results to those achieved from the hot metal version when letterpress printed. Hot metal drawings were digitized and extensive editing was carried out on the resultant outlines to ensure that design features and overall color from the digital output remained close to that of the

letterpress product. *Bembo Book* is slightly narrower than existing digital versions of the face; it is a little more economical in use and gives excellent color to continuous pages of text. Ascending lowercase letters are noticeably taller than capitals, giving an elegant, refined look to the text. Developed by *Robin Nicholas* at *Monotype*, *Bembo Book* is now available in Regular and Bold weights with complementary italics, each font has lining (12345) and old style (12345) numerals with small capitals for Roman and Bold Roman fonts.

Imagine that you have before you a flagon of wine. You may choose your own favorite vintage for this imaginary demonstration, so that it be a deep shimmering crimson in color. You have two goblets before you. *One is of solid gold, wrought in the most exquisite patterns. The other is of crystal-clear glass, thin as a bubble, and as transparent. Pour and drink; and according to your choice of goblet, I shall know whether or*
